

CASE STUDY - A40 TRAILER PUMP

> BACKGROUND:

O'Sullivan Civil, a long-time user of alternative pumping systems, approached CGS seeking a solution for Shotcrete applications.

CGS took the time to understand the O'Sullivan Civil business and desire application of the machine so it could offer a solution that satisfies all of the customer's requirements.

OBJECTIVE:

Provide an equipment solution that achieves the desired outcomes for O'Sullivan Civil on its Shotcrete jobs. The machine had to be sturdy and reliable, easy for operators to use and deliver consistent and high-quality output.

CASE STUDY - A40 TRAILER PUMP

➤ THE CGS SOLUTION:

CGS agreed to provide a trial of the REED A40HP on a local jobsite, confident the pump would exceed the customer's expectations. The trial was successful with the Nozzleman very happy with line pressure and range in particular. The customer has since purchased multiple machines from CGS who proudly service this fleet under a regular maintenance program.
