

CASE STUDY - PUMP CUSTOMISATION

> BACKGROUND:

MGI piling required a powerful concrete pump capable of undertaking piling and shotcrete projects. The customer required a pump that was capable but also mobile to deliver flexibility of movement between jobs and at each job site.

OBJECTIVE:

CGS committed to finding a bespoke solution for MGI piling that would deliver the customer with the pumping specifications required whilst also making custom changes to the machine based on the customer's specific requirements.

CASE STUDY - PUMP CUSTOMISATION

➤ THE CGS SOLUTION:

The REED B50HP machine was selected for its power, versatility, ease of use, simplicity and reliability. The machine was mounted to an Iveco truck to allow the convenience and flexibility of movement.

MGI Piling selected CGS due to its ability to offer a fully-customisable solution, supported by CGS' extensive product knowledge and parts range.
